

FBI STATISTICS

By Patriot Crime Defense On October 16, 2012

The following statistics were taken from NCVS (National Victimization Data Survey) and UCS (Uniform Crime Reports).

The FBI Says:

Every 12 seconds a home is invaded

6,646 break-ins every day

Over 3.5 million burglaries per year

13% of homes are burglarized per year

19.2% of rental properties are burglarized per year

85% of all break-ins are through the door

67% of all burglaries involved forcible entry

38% of all assaults occur during a home invasion

60% of all rapes occur during a home invasion

70% of burglaries involve residential properties

Burglaries happen between 9 a.m. and 5 p.m.

Home Invasions happen between 6 p.m. and 6 a.m.

If these statistics were not staggering enough:

The FBI states that only 12.4% of burglars are ever caught, charged and convicted!

The FBI claims 'Every 12 seconds a home invasion occurs by somebody going right through the front or back door'. This happens in 85% of all break-ins. Door frame failure is virtually always the cause. This type of burglary is too lucrative and holds very little risk for the criminal.
